# Yash Vardhan Singh

Greater Noida, India | +91-9305125469 | yashvardhansingh234679@gmail.com

LinkedIn GitHub Codolio Portfolio

## Summary

Third-year IT student focused on full-stack web development with Next.js and TypeScript, with strong fundamentals in Java and DSA. Built a ticket operations dashboard with live metrics and an AI-assisted resolution flow, and a Java CLI tool using AES encryption and PBKDF2 key derivation. Solved **1,000+** DSA problems on Codeforces, CodeChef and LeetCode. Seeking a software development internship.

## Education

**GL Bajaj Institute of Technology and Management**, Greater Noida [Expected Graduation: 2028]
*B.Tech in Information Technology | CGPA: 8.0/10*

## Technical Skills

**Languages:** Java, Python, SQL, TypeScript, JavaScript
**Web Development:** Next.js, React, Tailwind CSS, React Hooks, REST APIs
**Core CS:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
**Security:** Cryptography, AES, PBKDF2, Secure Key Derivation
**Tools:** Git, GitHub, Linux Terminal

## Projects

**ResolveAI** | *Next.js 16, TypeScript, Tailwind CSS v4, React Hooks* [September 2026]

- Built a responsive web app with the Next.js App Router and TypeScript, including a landing page, pricing tiers and an AI chat assistant that answers product FAQs.
- Developed a ticket operations dashboard tracking 3 ticket states (open, in-progress, resolved) with 4 live metrics: total tickets, open queue, resolved count and AI precision score.
- Implemented an AI Copilot drawer with confidence scoring and step-by-step resolution guidance, using React Hooks to update the UI live on one-click resolve.
- GitHub: github.com/Yashsingh0607/resolveai

**Secure File Encrypter** | *Java, AES, PBKDF2* [March 2026]

- Built a Java command-line utility that encrypts and decrypts files using AES in CBC mode.
- Derived keys with PBKDF2 (65,536+ iterations) and generated a unique salt and IV for every file.
- Designed a self-contained file format (Salt + IV + Ciphertext) so each file carries everything needed for decryption.
- Added input validation, error handling and 3 CLI commands (encrypt, decrypt, help).
- GitHub: github.com/Yashsingh0607/SecureFileEncrypter

## Competitive Programming and Achievements

- Solved 1,000+ Data Structures and Algorithms problems on coding platforms, primarily in Java.
- Ratings: Codeforces 1236, CodeChef 1421, LeetCode Contest 1583.
- Led a team in Smart India Hackathon (SIH) 2026, coordinating development, task division and problem-solving.

## Certifications

- Programming in Java (NPTEL) | View certificate [Jan–Apr 2025]
- Data Structures and Algorithms (NPTEL) | View certificate [Jul–Oct 2025]
- Cryptography and Network Security (NPTEL) | View certificate [Jan–Apr 2026]
- Introduction to Machine Learning (NPTEL) | View certificate [Jul–Oct 2026]
